

## Smart GPS Tracker with 2-way communication (make and receive calls) incl. fall detector Perfect for runners, elderly, traveler and kids

Multi-purpose mini GPS tracker that works worldwide, 2.5 x 1.8 x 0,6 inch and weighs as little as 1.4 oz.

Behind the little shell, we find the technology of the highest quality for people, pets and valuables tracking.

The distinctive feature of this device, in addition to the design and size are its battery life and performance. In Standby Mode, the battery can last up to 29 days. The normal working mode device will last 5 days.

It's based on the world's leading GPS technology and has a built-in GPS chip from Swiss U-Blox that is both lean and powerful little chip.

### Overview features

#### Fall down alert

- ✓ Including fall sensor, which automatically triggers the emergency call in case of a fall and transmits the current GPS position. You can set the sensitivity of the sensor as desired, you will find more detailed information in the operating instructions.

### **Call feature**

- ✓ In the event of an alarm, a 2-way connection is established automatically (callers and call partners can talk freely)
- ✓ The device can also receive calls.

### **SOS / Panic Button**

- ✓ Automatically sets up a call by pressing the SOS button and sends the current GPS position as text message.
- ✓ 3 Destination numbers can be stored, which are called consecutively if a called person does not answer

### **Live tracking**

- ✓ Track via AMG Smart tracking system.

### **App**

- ✓ The programming / modification of the default settings is made simply through the app. The app is free of charge and available for IOS and Android.

### **Geo-Fence**

- ✓ The unit alarms by sending you a text message if it is outside a defined area

### **Monitoring**

- ✓ GPS Tracker will automatically answer your calls and enables voice monitoring e.g. elderly person or a child.
- ✓ The current GPS position can be queried at any time.

### **Battery life**

- ✓ Up to 5 days, for charging simply place in the charging station.

### **Fall down alert**

- ✓ Device supports fall down function; meaning if a person falls down an alert will be sent out

### **Track by time interval**

- ✓ Set the time interval of at least 10 seconds and you will receive information about the position repeatedly

### **Built-in G-sensor**

- ✓ The unit will be set to report its position once it is in motion.

### **Low battery alarm**

- ✓ When the battery is low, you'll receive a text message telling you the battery level and that it needs to be charged.

### **Speeding alarm**

- ✓ Set the speed limit to get the information if it is exceeded
